-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II, claims 20-22, in the reply filed on 04 September 2009 is acknowledged. Applicant criticizes the references cited in the restriction requirement. Applicant contends that they do not show a batch reactor. The examiner now directs applicant to Campbell (US 1,519,664), which clearly discloses a batch vessel, and the other shared features of the two groups.

The requirement is still deemed proper and is therefore made FINAL.

Information Disclosure Statement

2. The information disclosure statement filed 02 September 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Campbell (US 1,519,664). Campbell discloses a method stirring using an apparatus comprising a vessel (1) having a conduit (16) extending therefrom, a stirrer (13,25), a section of which is adapted to be located within the conduit and a second which is adapted to be located within the vessel, wherein said stirrer is adapted such that, when rotate in a first direction, material contained within the conduit is conveyed in a direction towards the vessel, and when rotated in a second direction, material within the conduit is conveyed through the conduit in a direction away from the vessel, and a stirrer drive (14,37,38,39) able to rotate the stirrer in both the first direction and the second, opposite direction. The size of the vessel is not disclosed. See *In re Rose*, 220 F.2d 459, 105 USPQ 237 (CCPA 1955) regarding the obviousness of selecting a size.

Allowable Subject Matter

5. Claims 21 and 22 are allowed.
